## Goals and Objectives

The goals of the Fall 2009 Energy For Change program were to:

- Reduce energy consumption in homes, businesses, and communities
- Increase the use of renewable energy sources

- Promote environmental sustainability
- Create jobs and stimulate economic growth

## **Initiatives**

The Fall 2009 Energy For Change program included a variety of initiatives to achieve its goals. These initiatives included:

- **Energy efficiency upgrades:** The program provided funding for energy efficiency upgrades in homes, businesses, and communities. These upgrades included insulation, energy-efficient appliances, and lighting.
- **Renewable energy projects:** The program provided funding for renewable energy projects, such as solar and wind installations.
- **Education and outreach:** The program provided education and outreach materials to help communities and organizations understand the benefits of energy efficiency and renewable energy.
- **Technical assistance:** The program provided technical assistance to communities and organizations to help them develop and implement energy efficiency and renewable energy projects.

## **Impact**

The Fall 2009 Energy For Change program had a significant impact on communities across the United States. The program helped to reduce energy consumption, increase the use of renewable energy, and promote environmental sustainability. The program also created jobs and stimulated economic growth.

Here are some specific examples of the impact of the Fall 2009 Energy For Change program:

- The program helped to reduce energy consumption in homes, businesses, and communities by an average of 15%. This reduction in energy consumption saved communities money on their energy bills and helped to reduce greenhouse gas emissions.
- The program helped to increase the use of renewable energy sources by an average of 20%. This increase in renewable energy use helped to reduce dependence on fossil fuels and promote environmental sustainability.
- The program created jobs and stimulated economic growth by providing funding for energy efficiency and renewable energy projects. These projects created jobs in the clean energy sector and helped to boost local economies.

The Fall 2009 Energy For Change program was a successful initiative that helped to reduce energy consumption, increase the use of renewable energy, and promote environmental sustainability. The program also created jobs and stimulated economic growth. The program's success demonstrates the importance of investing in energy efficiency and renewable energy.
