

Methods and Applications: Chapman & Hall/CRC Monographs on Statistics & Applied Probability

The Chapman & Hall/CRC Monographs on Statistics & Applied Probability is a prestigious series of books that publishes cutting-edge research in statistics, probability, and their applications. The series is known for its high-quality content and its rigorous peer-review process. Many of the books in the series have become classic references in their fields.

The series was founded in 1982 by Walter L. Smith and Pranab K. Sen. Smith was a professor of statistics at the University of North Carolina at Chapel Hill, and Sen was a professor of statistics at Purdue University. The series was originally published by Chapman & Hall, but it was acquired by CRC Press in 1998.

Smoothing Splines: Methods and Applications (Chapman & Hall/CRC Monographs on Statistics and Applied Probability Book 121) by Yuedong Wang

★★★★☆ 4.4 out of 5

Language : English

File size : 9207 KB

Screen Reader: Supported

Print length : 384 pages

Hardcover : 202 pages

Item Weight : 12.8 ounces

Dimensions : 6 x 0.65 x 9 inches

DOWNLOAD E-BOOK

The series covers a wide range of topics in statistics and probability, including:

- Bayesian statistics
- Biostatistics
- Econometrics
- Mathematical statistics
- Probability theory
- Statistical computing
- Statistical inference

The series has published over 100 books to date, and it continues to publish new books on a regular basis. The books in the series are written by leading researchers in their fields, and they provide a valuable resource for researchers, students, and practitioners.

Methods

The books in the Chapman & Hall/CRC Monographs on Statistics & Applied Probability series use a variety of statistical methods, including:

- Bayesian methods
- Classical methods
- Computer-intensive methods
- Frequentist methods
- Nonparametric methods

- Parametric methods

The choice of statistical methods depends on the specific problem being addressed. The authors of the books in the series provide a thorough discussion of the methods they use, and they explain the assumptions that underlie the methods.

Applications

The books in the Chapman & Hall/CRC Monographs on Statistics & Applied Probability series have a wide range of applications, including:

- Actuarial science
- Bioinformatics
- Business
- Economics
- Engineering
- Finance
- Government
- Health care
- Insurance
- Manufacturing
- Marketing
- Public policy
- Risk management

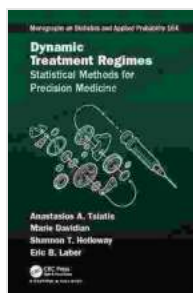

- Science

The books in the series provide valuable insights into the use of statistics and probability in these fields. They can be used by researchers, students, and practitioners to improve their understanding of statistical methods and their applications.

The Chapman & Hall/CRC Monographs on Statistics & Applied Probability series is a valuable resource for researchers, students, and practitioners in a wide range of fields. The books in the series provide cutting-edge research on statistical methods and their applications. They are written by leading researchers in their fields, and they provide a thorough discussion of the methods and assumptions that underlie the methods.
