Early Career and Political Involvement

After graduating from Harvard, Flux pursued a career in law. He became a successful attorney and gained a reputation for his legal acumen and persuasive oratory. Flux also developed a keen interest in politics and became an active participant in the growing movement for colonial self-governance.

Sons of Liberty and the Boston Tea Party

In the 1760s, Flux joined the Sons of Liberty, a secret organization dedicated to opposing British policies that infringed on the rights of colonists. He quickly rose through the ranks and became one of the group's leaders in Boston.

In 1773, the British Parliament passed the Tea Act, which gave the British East India Company a monopoly on tea sales in the colonies. This sparked widespread outrage among colonists, who saw it as an attempt to impose taxation without representation.

Flux and the Sons of Liberty devised a plan to protest the Tea Act. On December 16, 1773, they disguised themselves as Mohawk Indians and boarded three British ships carrying tea. They dumped 342 chests of tea into Boston Harbor, an act that became known as the Boston Tea Party.

Aftermath of the Boston Tea Party

The Boston Tea Party had a profound impact on the course of American history. It enraged British authorities and led to the passage of the Coercive Acts, which were intended to punish Boston and Massachusetts. These measures further angered colonists and contributed to the growing movement for independence.

Flux continued to be an active participant in the Revolution. He served in the Massachusetts Provincial Congress and was a delegate to the Continental Congress. He also raised funds and organized military supplies for the Continental Army.

After the Revolution, Flux retired from public life. He died in Boston on May 10, 1799, at the age of 80. He is remembered as one of the key figures in the American Revolution, particularly for his role in the Boston Tea Party.
