The Routledge Handbook of Disability Studies is a comprehensive guide to the field of disability studies. It provides an overview of the key concepts and theories in the field, as well as a discussion of the latest research and debates. The handbook is written by a team of leading scholars in the field, and it is an essential resource for anyone interested in disability studies.

## Key Concepts and Theories in Disability Studies

The Routledge Handbook of Disability Studies begins with an overview of the key concepts and theories in the field. These concepts include:

- **Disability:** Disability is a social construct that is based on the idea that certain individuals are different from the norm and are therefore less valuable.
- **Impairment:** Impairment is a physical, mental, or sensory condition that limits an individual's ability to function in a particular way.

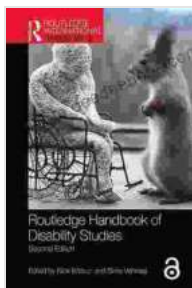

- **Discrimination:** Discrimination is the unfair treatment of individuals with disabilities. Discrimination can take many forms, including physical barriers, social exclusion, and economic inequality.
- **Accommodation:** Accommodation is the process of making changes to the environment or to services in order to make them accessible to individuals with disabilities.
- **Inclusion:** Inclusion is the process of creating a society in which individuals with disabilities are fully integrated and valued.

## Latest Research and Debates in Disability Studies

The Routledge Handbook of Disability Studies also provides a discussion of the latest research and debates in the field. These debates include:

- **The medical model of disability:** The medical model of disability views disability as a medical problem that can be cured or treated.
- **The social model of disability:** The social model of disability views disability as a social construct that is created by the way that society treats individuals with disabilities.
- **The intersectionality of disability:** Intersectionality is the theory that individuals with disabilities experience multiple forms of discrimination and oppression based on their race, gender, sexual orientation, and other identities.
- **Disability rights:** Disability rights are the rights of individuals with disabilities to live full and equal lives.
- **Disability culture:** Disability culture is the unique culture that is created by individuals with disabilities.
